To whom it may concern

This is to confirm the collaboration of Prof Ellen Solomon and Prof David Grimwade (King's College London) with Prof Eduardo Rego (School of Medicine, University of Sao Paulo, FMRP-USP Ribeirao Preto). This is part of our International Exchange programme between USP and King's College London.

Prof Rego has undertaken pioneering work in the treatment of Acute Promyelocytic leukaemia in developing countries, demonstrating marked improvements in survival rates. As part of this collaboration we are hosting a student from Prof Rego's laboratory, for six months, to learn a number of experimental techniques which could improve our understanding of this leukaemia ,and ultimately lead to novel treatment approaches.

We fully support further collaborations, and would like to facilitate longer exchanges.

Please let me know if you require further information in support of the FAPESP grant.

Yours sincerely

Ellen Solomon
*Dean for International Affairs,
King's College London School of Medicine*
